For Publishers & Mobile Developers

Why Publishers Choose Perkox

Rewarded monetization infrastructure that helps you monetize engaged non-paying users.

Complements IAP and ads

Add a high-converting revenue stream without cannibalizing existing monetization.

Native offerwall experiences

Beautiful, on-brand offerwalls that feel like part of your product.

Fast SDK integration

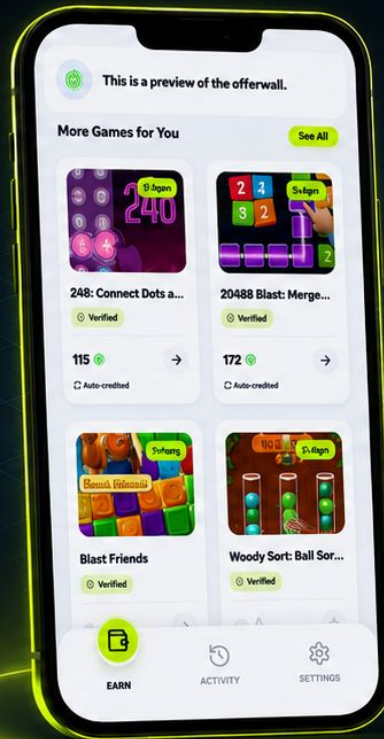

Production-ready SDK with clear docs and minimal implementation effort.

Built for mobile apps & games

Engineered to scale across genres, regions, and user behaviors.

Perkox helps publishers turn user engagement into measurable revenue with native offerwall experiences, secure reward validation, and real-time monetization visibility.

What publishers care about

More revenue coverage

Better user experience

Developer control

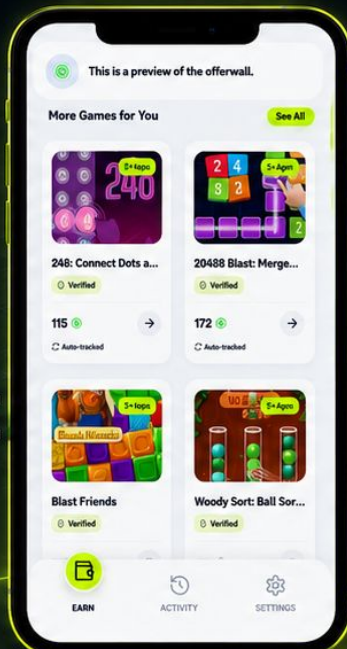

Faster time to launch

Choose the Experience That Fits Your Product

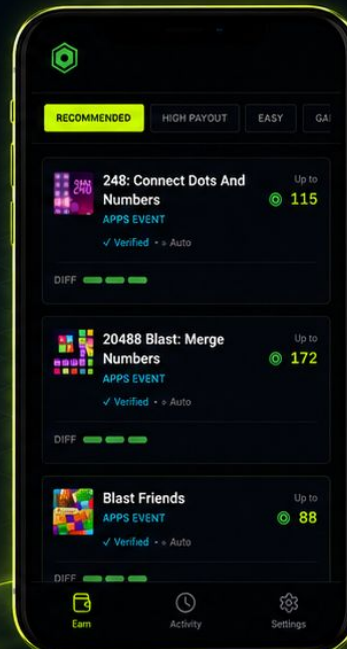

One SDK. Multiple offerwall experiences.

Modern Experience

- ✓ Best for premium apps & advanced games
- ✓ Card-based browsing and discovery
- ✓ Polished native UI

Classic Experience

- ✓ Best for casual games and lightweight flows
- ✓ High clarity and fast browsing
- ✓ Familiar reward layout

Customizable UI

Reward Optimization

Developer Control

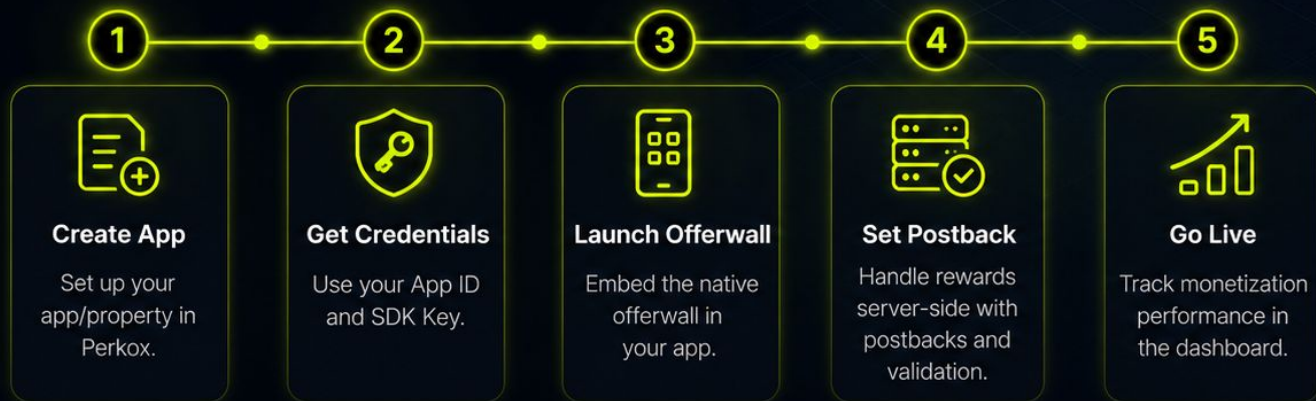

Seamless Integration

Both experiences are designed to adapt to different app styles, user behaviors, and monetization strategies.

Fast SDK Integration.

Go from setup to live monetization in a simple workflow.

Supported today

Android SDK

iOS SDK

Designed for quick onboarding and developer-friendly deployment.

Control the Monetization Experience

Perkox gives publishers flexibility without sacrificing product fit.

Adapt the offerwall to your app economy, UX, and reward logic so the experience feels aligned with your product rather than bolted on.

Custom Currency

Use your in-app currency and naming to match your economy.

Analytics That Help You Optimize.

Track the metrics that matter for monetization decisions.

Perkox gives publishers a clear view into monetization performance across placements, traffic, and rewarded engagement.

See what is earning

Identify top-performing placements and traffic sources.

Understand conversion quality

Analyze conversions, eCPM, EPC, and CR to optimize traffic and offers.

Monitor user value over time

Track ARPPDAU, DAU, and MAU to measure engagement and long-term value.

Built for **Mobile Publishers.**

A rewarded monetization layer designed for apps and games.

Casual Games

Reward-driven progression and optional earning paths.

Mobile Apps

Monetize engaged users without disrupting the core experience.

Reward Apps

Add offer-based earning flows with clear validation.

Growth Teams

Track monetization and engagement from one command center.
